INTERIM TITLE INDEX

Vol. 59 (1968)

Actinomycin-B, 4–nitroquinoline 1–oxide, and quinoxaline antibiotics, comparison of effects among. Segregation of the nucleolar materials produced by quinoxaline antibiotics in JTC–13 cells 513

————**-D,** antitumor effect of, on transplantable Wilms tumor in rats 473

Adenovirus type 12. A search for a complement-fixing antibody in cancer patients against the tumor antigen of 79

Aggregate-forming activity, characteristic and selective, of neoplastic cells in culture 281

Aldolase isozyme patterns, changes in, of human cancerous tissues.....415

Aluminium compound, effect of, on the development of experimental lung tumor in mice 433

Amine, N-nitrosodiethyl-, hepatocarcinogenesis, enhancement of, by L-tryptophan in rats 523

———, **N-nitrosodimethyl-,** acute nucleolar morphological change produced by, in mouse hepatic parenchymal cells 151

———, ————————. Acceleration of liver cell proliferation *in vitro* by 437

———, methyl-bis(2–chloroethyl)-, N-oxide hydrochloride. Effect of oxygen at high pressure on the growth of Ehrlich ascites tumor, especially on the combined therapy with 25

———, N-methyl[^{14}C]-bis(3–mesyloxypropyl)-, hydrochloride, distribution of, and its metabolites in normal and tumor-bearing rats 481

Aminoazo dyes, carcinogenic, the binding of, with liver proteins.....231

Amyloidosis, systemic, induction of hepatoma and, in mice by 4–(dimethylamino)azobenzene feeding.....201

———— and leukemia, induction of, in senile C57BL mice by oral feeding of 3–methylcholanthrene in olive oil solution 489

Anterior pituitary in rat. Lack of effect of 7,12–dimethylbenz[*a*]anthracene on the prolactin secretory activity of.....357

Anthralin painting, skin papilloma production by, after urethan initiation in mice 187

———— painting of mice. Induction of malignant lymphoma and other tumors during experiments with.....195

Antibody, complement-fixing, a search for, in cancer patients against the tumor antigen of adenovirus type 12.....79

Antitumor studies on some extracts of Basidiomycetes 159

———— **action** of some Basidiomycetes, especially *Phellinus linteus*.....155

———— —— of some glucans, especially on its correlation to their chemical structure 507

———— **activity** and fractionation of bagasse polysaccharide 35

———— ———— of the regional lymph node protein.....109

———— ———— on sarcoma–180 of the polysaccharide preparations from lichens 421

———— ———— of polysaccharide fractions prepared from some strains of Basidiomycetes 443

———— **agent,** *in vitro* production of, by reticuloendothelial cells.....273

Ascites carcinoma cells, Ehrlich. Effect of drying on survival of.....73

———— **hepatoma cells,** rat, in normal tissues, various malignant and minimal deviation hepatomas. Activity of the cell-sap factor inhibiting DNA synthesis of 51

———— **tumor,** Ehrlich, effect of oxygen at high pressure on the growth of.....25

Azobenzene, 3,4-dimethoxy-4-amino-, and 3-methoxy-4-aminoazobenzene. Carcinogenicity and target organs of methoxyl derivatives of 4-aminoazobenzene in rats.....131

————, **3-methoxy-4-amino-,** and 3,4-dimethoxy-4-aminoazobenzene. Carcinogenicity and target organs of methoxyl derivatives of 4-aminoazobenzene in rats 131

————, **4-(dimethylamino)-.** Inhibitory effect of dehydroacetic acid on induction of hepatoma in rats fed.....85

————, ————, feeding. Induction of hepatoma and systemic amyloidosis in mice by.....201

Basidiomycetes. Antitumor action of...155

————. Antitumor studies on some extracts of 159

————. Antitumor activity of polysaccharide fractions prepared from some strains of.....443

Benz[*a*]anthracene, 7,12-dimethyl-, lack of effect of, on the prolactin secretory activity of anterior pituitary in rat 357

————, ————. Prolactin and growth hormone levels in the anterior pituitary of rats bearing mammary tumor induced by.....543

3,4-Benzopyrene. Determination of the structure of the free radical produced by 289

Binding of carcinogenic aminoazo dyes with liver proteins, nature of 231

C57BL mice, senile, induction of leukemia and amyloidosis in, by oral feeding of 3-methylcholanthrene in olive oil solution 489

Cancerous tissues, human. Changes in aldolase isozyme patterns of 415

Carcinogenic effect of 4-nitroquinoline 1-oxide and β-rays, summation of.....43

Carcinogenicity and target organs of methoxyl derivatives of 4-aminoazobenzene in rats.....131

———— of simultaneously administered 2-acetamidofluorene and 3-methylcholanthrene in the hamster.....177

Carcinostatic aactivity of 4(or 5)-aminoimidazole-5(or 4)-carboxamide derivatives.....207

———— **agents,** screening of, in organ culture 397

Carcinoma, stomach, in incipient phase: Its histogenesis and histological appearances 251

Catalase in liver cell fractions. Combined immunochemical and enzymic determination of 461

————**-depressing substance** prepared from the tumor. Effect on various types of liver catalase by administration of 317

Cell-sap factor inhibiting DNA synthesis of rat ascites hepatoma cells, activity of, in normal tissues, various malignant and minimal deviation hepatomas.....51

Chemical carcinogenesis and tissue components. Electron spin resonance study on the interaction between.....289

Chemotherapy of induced skin tumors in mice 367

Cholangiocarcinoma, well-differentiated, and cholangiofibrosis, histogenesis of, in Syrian hamsters given 2-acetamidofluorene or 2-diacetamidofluorene 239

Cholangiofibrosis and well-differentiated cholangiocarcinoma, histogenesis of, in Syrian hamsters given 2-acetamidofluorene or 2-diacetamidofluorene 239

Cholanthrene, 3-methyl-, on HeLa cells. The rôle of lysosomes in the photosensitizing effect of.....1

————, ————, and 2-acetamidofluorene. Carcinogenicity in the hamster 177

————, ————, organ distribution of, after repeated painting and oral administration in relation to the induction of leukemia in mice 223

————, ————, in olive oil solution. Induction of leukemia and amyloidosis in senile C57BL mice by oral feeding of 489

Chromosomal features and DNA content of Yoshida ascites sarcoma and its slow-growing variants.....327
Cigarette tar. Induction of malignant lymphomas in ICR mice treated with ...363
Cycasin. Induction of mammary cancer in rats with 361
Cytocidal effect of sensitized peritoneal lymphocytic cells of Donryu rats against the target Yoshida sarcoma cells *in vitro* 7
Cytosine arabinoside therapy, effectiveness of, on leukemia (L-1210) of the central nervous system in mice arising during Methotrexate treatment.....527
Dehydroacetic acid, inhibitory effect of, on induction of hepatoma in rats fed 4-(dimethylamino)azobenzene 85
Deoxyribonuclease activity, histochemical studies on, in normal and azo dye-fed rat livers by the modified phosphatase method 19
DNA content and chromosomal features of Yoshida ascites sarcoma and its slow-growing variants 327
—— **replication,** two different units of, as revealed by the use of hydroxyurea in synchronized L cells 171
—— **synthesis,** activity of the cell-sap factor inhibiting, of rat ascites hepatoma cells in normal tissues, various malignant and minimal deviation hepatomas 51
Donryu rat. Cytological individuality of hepatoma cell lines derived from.....341
Electron spin resonance study on the interaction between the chemical carcinogens and tissue components.....289
———— **transport** system, NADPH-linked, activities of, in tumor-bearing rats 83
Enzyme activities, liver. Effect of growth of Rhodamine sarcoma in rat on.....299
Erythroblastic cell lines, establishment of, from the spleen of mice with Rauscher leukemia.....439
Fluorene, 2-acetamido-, and 3-methylcholanthrene. Carcinogenicity in the hamster 177
————, ————, or 2-diacetamidofluorene. Histogenesis of cholangiofibrosis and well-differentiated cholangiocarcinoma in Syrian hamsters given 239
Foster nursing, effect of, on occurrence of mammary tumors and establishment of a milk agent-free substrain C3HeB/Os 547
Free radical, determination of the structure of, produced from 3,4-benzopyrene 289
Friend viral leukemia cells *in vitro.* Clonal analysis of.....377
——— **virus.** Spontaneous elimination of virus from sarcoma originally associated with 537
——— ———. Possible effec of NTF sarcoma on activity and multiplication of 541
Glucans, antitumor action of, especially on its correlation to their chemical structure 507
Growth hormone levels and prolactin in the anterior pituitary of rats bearing mammary tumor induced by 7,12-dimethylbenz[*a*]anthracene 543
Hamster, carcinogenicity of simultaneously administered 2-acetamidofluorene and 3-methylcholanthrene in 177
HeLa cells. The rôle of lysosomes in the photosensitizing effect of 3-methylcholanthrene on 1
Hepatic cells, mouse parenchymal. Acute nucleolar morphological change produced by dimethylnitrosamine in 151
Hepatoma, induction of, and systemic amyloidosis in mice by 4-(dimethylamino)azobenzene feeding 201
———— **cells.** Some characteristics in the pathway of RNA synthesis in.....61
———— ——— lines, cytological individuality of, derived from a single Donryu rat 341
Histochemical studies on deoxyribonuclease activity in normal and azo dye-fed rat livers by the modified phos-

phatase method 19
Hydroxyurea in synchronized L cells. Two different units of DNA replication as revealed by the use of.....171
Imidazole-carboxamide, 4- or 5-amino-, derivatives. Carcinostatic activity of 207
Immunological response of adoptive transfer for the growth of Yoshida sarcoma 453
JTC-13 cells. Segregation of the nucleolar materials produced by quinoxaline antibiotics in 513
L cells, synchronized. Two different units of DNA replication as revealed by the use of hydroxyurea in.....171
Leukemia, induction of, in mice. Organ distribution of 3-methylcholanthrene after repeated painting and oral administration in relation to.....223
————, occurrence of, by an application of Poisson distribution.....263
———— and amyloidosis, induction of, in senile C57BL mice by oral feeding of 3-methylcholanthrene in olive oil solution 489
———— (L-1210), effectiveness of cytosine arabinoside therapy on, of the central nervous system in mice arising during Methotrexate treatment 527
Lichens and fungi. Polysaccharides in.....421
Litter number and primiparous age, influence of, on the mammary tumor age in mice 217
Liver catalase, effect on various types of, by growth of Rhodamine sarcoma and by administration of *in vivo* catalase-depressing substance prepared from the tumor 317
—— ————. Chromatographic analysis of 467
—— ————**-depressing substance,** *in vivo*, from Rhodamine sarcoma.....405
—— **cell** proliferation *in vitro*, acceleration of, by N-nitrosodimethyl amine.....437
—— —— fractions. Combined immunochemical and enzymic determination of catalase in.....461
—— **proteins,** further evidence on the nature of binding between aminoazo dyes and, with special reference to the site of binding 231
Lung, oat-cell carcinoma of, containing serotonin granules 123
——, lymphangiosis carcinomatosa. A pathological study 387
—— **cancer,** experimental, in rabbits.....163
—— ————, experimental, in rabbits induced by chemical carcinogens 497
—— **tumor,** experimental, in mice. Effect of aluminium compound on the development of 433
Lymph node protein, regional, antitumor activity of 109
Lymphangiosis carcinomatosa of the lung. A pathological study.....387
Lymphocytic cells, sensitized peritoneal, cytocidal effect of, of Donryu rats against the target Yoshida sarcoma cells *in vitro* 7
Lymphoma, malignant, induction of, and other tumors during experiments with anthralin painting of mice.....195
————, malignant, induction of, in ICR mice treated with cigarette tar 363
Lysosomes, the rôle of, in the photosensitizing effect of 3-methylcholanthrene on HeLa cells 1
Mammary cancer, induction of, in rats with Cycasin 361
———— **tumor** age in mice. Influence of primiparous age and litter number on 217
———— ——-bearing rats, prolactin and growth hormone levels in the anterior pituitary of, induced by 7,12-dimethylbenz[*a*]anthracene 543
———— ——. Establishment of a milk agent-free substrain C3HeB/Os and effect of foster nursing on occurrence of ...547
Mastomys (*Rattus natalensis*). Spontaneous tumor of the thymus in 145
Methotrexate treatment. Effectiveness of cytosine arabinoside therapy on leukemia (L-1210) of the central nervous system in mice during 527

NADPH-linked electron transport system, activities of, in tumor-bearing rats 83
Neoplastic cells in culture. Characteristic and selective aggregate-forming activity of 281
NTF sarcoma, possible effect of, on activity and multiplication of Friend virus 541
Nucleolar change, acute morphological, produced by dimethylnitrosamine in mouse hepatic parenchymal cells 151
Oncolytic effect of *Proteus mirabilis* upon tumor-bearing animals 117
Organ culture. Screening of carcinostatic agents in 397
Oxygen at high pressure, effect of, on the growth of Ehrlich ascites tumor.....25
——— at high pressure, influence of, on the proliferation of cells in tissue culture 97
Phellinus linteus. Antitumor action of some Basidiomycetes 155
Poisson distribution, an application of, to the occurrence of leukemia.....263
Polysaccharide, bagasse. Fractionation and antitumor activity of 35
——————— in lichens and fungi.....421
——————— fractions, antitumor activity of, prepared from some strains of Basidiomycetes 433
Primiparous age and litter number, influence of, on the mammary tumor age in mice 217
Prolactin secretory activity of anterior pituitary in rat. Lack of effect of 7,12-dimethylbenz[*a*]anthracene on 357
——— and growth hormone levels in the anterior pituitary of rats bearing mammary tumor induced by 7,12-dimethylbenz[*a*]anthracene 543
Proteus mirabilis, oncolytic effect of, upon tumor-bearing animals 117
Quinoline 1-oxide, 4-nitro-, and β-rays. Summation of carcinogenic effect of 43
———— ————, ———. Quantitative determination of *in vivo* conversion in subcutaneous tissue of rat.....247
———— ———, ————, Actinomycin-B, and quinoxaline antibiotics. Comparison of effects among. Segregation of the nucleolar materials produced by quinoxaline antibiotics in JTC-13 cells 513
Quinoxaline antibiotics. Segregation of the nucleolar materials in JTC-13 cells produced by 513
Rabbits, experimental lung cancer in, induced by chemical carcinogens 497
Rats, normal and tumor-bearing. Distribution of N-methyl[^{14}C]-bis(3-mesyloxypropyl)amine hydrochloride and its metabolites in 481
Rauscher leukemia. Establishment of erythroblastic cell lines from the spleen of mice with 439
β**-Rays** and 4-nitroquinoline 1-oxide. Summation of carcinogenic effect of.....43
Reticuloendothelial cells. *In vitro* production of an antitumor agent by.....273
Rhodamine sarcoma, effect of growth of, in rat on some liver enzyme activities 299
———— ————, effect on various types of liver catalase by growth of 317
———— ————. *In vivo* liver catalase-depressing substance from.....405
RNA synthesis in hepatoma cells. Some characteristics in the pathway of.....61
Sarcoma-180, antitumor activities on, of the polysaccharide preparations from lichens 421
Serotonin granules. Oat-cell carcinoma of the lung containing.....123
Skin papilloma production by anthralin painting after urethan initiation in mice 187
—— **tumors,** induced, in mice. Chemotherapy of 367
Spontaneous elimination of virus from sarcoma originally associated with Friend virus 537
Substrain C3HeB/Os, milk agent-free, establishment of, and effect of foster nursing on occurrence of mammary tumors 547

Syrian hamsters given 2-acetamidofluorene or 2-diacetamidofluorene. Histogenesis of cholangiofibrosis and well-differentiated cholangiocarcinoma in ...239
Tissue culture. Influence of oxygen at high pressure on the proliferation of cells in 97
Tolerance-inducing agents, in tumor ascites? 167
L-**Tryptophan** in rats. Enhancement of N-nitrosodiethylamine hepatocarcinogenesis by 523
Tumors, viral and chemical, of rabbit skin. Localization of rabbit kidney vacuolating virus in.....259
——— **antigen** of adenovirus type 12. A search for a complement-fixing antibody in cancer patients against.....79
Urethan initiation in mice. Skin papilloma production by anthralin painting after 187
Virus, rabbit kidney vacuolating, localization of, in viral and chemical tumors of rabbit skin 259
Wilms tumor, transplantable, in rats. Antitumor effect of Actinomycin-D on 473
Yamagiwa's tar cancer and its historical significance 447
Yoshida ascites sarcoma, chromosomal features and DNA content of, and its slow-growing variants 327
——— **sarcoma.** Immunological response of adoptive transfer for the growth of 453
——— ——— **cells** *in vitro.* Cytocidal effect of sensitized peritoneal lymphocytic cells of Donryu rats against the target 7
